WRITING (10 баллов)

My big dream is to create my own website. I have been interested in the quest room theme for quite a long time, both in reality and in Alternate Reality Games. My website would be dedicated to various kinds of quests, that is you can go to the site and find

GM, Fox.

an activity that interests you. It would be full of everything from
"escape from various horror stories" to unexpectedly starting in-
teractive games without ^{Lex} living home, like "Lost Experience" and
"FIND 815" these games were created for the PR campaigns of the cult TV
series "Lost". Such a site would help people communicate with each
other much more than they do now, especially since jog and activity
in life have never harmed anyone.
